Newport Osteopractic Physical Therapy

261 Howard Blvd, Newport NC, 28570

INFORMED CONSENT FOR PHYSICAL THERAPY TREATMENT

• PHYSICAL THERAPY: Physical therapy is the health care profession that remediates impairments, functional limitations and activity participation restrictions and promotes optimal movement, function, and quality of life through accurate examination, diagnosis, and physical intervention. It is carried out by licensed physical therapists.

• SPECIALIZED CARE: Newport Osteopractic Physical Therapy employs specialized physical therapists who have earned an advanced level of training and competence in orthopedic practice and manual therapy practice. This allows Newport Osteopractic Physical Therapy to offer advanced level of care to its patients.

• INFORMED CONSENT: The term informed consent means that potential risks, benefits, and alternative treatments have been clearly explained. Our physical therapists offer a wide range of specialized treatment and services and will provide individualized information at the initial visit concerning treatment and options available for your specific condition.

• PATIENT RIGHTS: It is you right to ask your physical therapist about the treatment they have planned for you, given your individual history, physical therapy diagnosis, symptoms, and examination findings. Consequently, it is your right to discuss the potential risks and benefits for your physical therapy treatment. It is your right to decline any part of your treatment at any time during the session if you feel discomfort, pain, or have other unresolved concerns.

• POTENTIAL BENEFIT: Newport Osteopractic Physical Therapy is dedicated to maximizing the benefits you receive from treatment. These may include an improvement or resolution of your symptoms and an increase in your ability to perform daily activities with optimal movement. It is our goal that you experience increased strength, awareness, flexibility, and endurance with movement and that you experienced decreased pain and discomfort. You should also gain a greater knowledge about independently managing your condition and return to a level of optimal function.

• POTENTIAL RISK: There is no guarantee of a positive outcome for your condition. Risks of manual physical therapy and exercise-based treatment include aggravation of existing symptoms, discomfort, pain, and swelling; these symptoms are usually temporary. If you experience serious symptoms such as fainting, dizziness, light-headedness, shortness of breath, or unexplained muscle weakness that was not discussed as a possible outcome of your treatment, contact your physical therapist and/or physician immediately.

• MANUAL THERAPY:

o Joint mobilization is a skilled, passive movement of joint surfaces to reduce pain or improve mobility

o Joint manipulation is a mobilization technique utilizing a high acceleration, low amplitude thrust.

o There is risk associated with spinal manipulation. Adverse effects of cervical spine manipulation may include temporary increase in neck pain, radiating arm pain, headache, dizziness, impaired vision or ringing in the ears; rarely, serious complication can occur, the most serious being disruption of blood flow to the brain leading to stroke or death. The risk of severe neurovascular compromise has been reported between 1/50,000 to 1 in 5 million manipulations. The most serious adverse effect of lumbar spine manipulation is cauda equina syndrome, which causes extreme pressure on

the nerves at the bottom of the spinal cord; symptoms associated with cauda equine include urinary retention, fecal incontinence, and widespread neurological symptoms in the legs. The risk of serious complication in lumbar spine manipulation is extremely rare, reported at less than 1 in 100 million manipulations.

I voluntarily consent to the performance of physical therapy examination and treatment on myself (or on the patient named below, for whom I am legally responsible). I understand the potential risks and benefits of physical therapy interventions and have been provided with adequate information to make an educated decision regarding my care. My physical therapy provider has discussed the goals and purpose behind the proposed treatment and has educated me about alternative types of treatments for my condition. I also understand that the results from the physical therapy treatment are not guaranteed for my condition. I have had the opportunity to read this form and understand the above statements, accept the risks mentioned, and hereby consent and agree to the recommended physical therapy treatment over the entire course of treatment for my present condition and any future conditions for which I seek treatment. All of the questions concerning this care and treatment have been answered to my satisfaction.

DRY NEEDLING CONSENT AND INFORMATION FORM

What is dry needling?

Dry needling is a form of therapy in which fine needles are inserted into myofascial trigger points (painful knots in muscles), tendons, ligaments or near nerves in order to stimulate a healing response in painful musculoskeletal conditions. Dry needling is not acupuncture or Oriental Medicine; that is, it does not have the purpose of altering the flow of energy ("Qi") along traditional Chinese meridians for the treatment of diseases. In fact, dry needling is a modern, science-based intervention for the treatment of pain and dysfunction in musculoskeletal conditions such as neck pain, shoulder impingement, tennis elbow, carpal tunnel syndrome, headaches, knee pain, shin splints, plantar fasciitis, or low back pain.

Is Dry Needling safe?

Drowsiness, tiredness or dizziness occurs after treatment and a small number of patients (1 to 3%) and if affected, you are advised not to drive. Minor bleeding or bruising occurs after dry needling in 15 to 20% of treatments and is considered normal. Temporary pain during dry needling occurs in 60 to 70% of treatment. Existing symptoms can get worse after treatment less than 3% of patients; however, this is not necessarily a bad sign. Fainting can occur in certain patients (0.3%), particularly at the first treatment session when needling the head or neck regions. Dry needling is very safe; however, serious side effects can occur in less than one per 10,000 (less than 0.01%) of treatment. The most common serious side effect from dry needling is pneumothorax (lung collapse due to air inside the chest wall). The symptoms of dry needling induced pneumothorax commonly do not occur until after treatment is over, sometimes taking several hours to develop. The signs and symptoms of a pneumothorax may include shortness of breath on exertion, increased breathing rate, chest pain, dry cough, bluish discoloration of the skin, or excessive sweating. If such signs and or symptoms occur, you should immediately contact your physical therapist or physician. Nerves or blood vessels may be damaged from dry needling which can cause pain, numbness or tingling; however, this is a very rare event and is usually temporary. Damage to internal organs has been reported in the medical literature following needling; however, these are extremely rare events (1 in 200,000).

Is there anything your practitioner needs to know?

1) Have you ever fainted or experienced a seizure? YES/NO
2) Do you have a pacemaker or any other electrical implant? YES/NO
3) Are you currently taking anticoagulents (blood-thinners e.g. aspirin, Warfarin, Coumadin) YES/NO
4) Are you currently taking antibiotics for an infection? YES/NO
5) Do you have a damaged heart valve, metal prosthesis or other risk of infection? YES/NO
6) Are you pregnant or actively trying for a pregnancy? YES/NO
7) Do you suffer from metal allergies? YES/NO
8) Are you a diabetic or do you suffer from impaired wound healing? YES/NO
9) Do you have hepatitis B, Hepatitis C, HIV, or any other infectious disease? YES/NO
10) Have you eaten in the last 2 hours. YES/NO
11) Single –use, disposable needles are used in this clinic.

STATEMENT OF CONSENT

I confirm that I have read and understand the above information, and I consent to having dry needling treatments. I understand that I can refuse treatment at any time.

HIPPA COMPLIANT MEDICAL AUTHORIZATION

FOR DISCLOSURE OF HEALTH INFORMATION

To whom it may concern:

I,_____, _____

Name Date of Birth

hereby authorize the release of all medical documentation and other information, including protected health information that I could personally obtain upon request, which may be in the possession of any health care provider, medical care facility, insure, physician, hospital, ambulance service or nurse or any other covered entity under the Health Insurance Portability and Accountability Act of 1996 ("HIPPA) TO

_____, _____

Name Date of Birth, Phone Number, Relationship to Patient

_____, _____

Name Date of Birth, Phone Number, Relationship to patient

Regarding my complete medical history and physical and mental condition both prior to and subsequent to the date of this authorization, regardless of loss time. The person(s) named above is/are hereby designated as my "personal representative(s)" as that term is used within HIPPA.

I intend the person(S) listed above to have the authority to gain immediate access to my medical records.

Upon presentation of this authorization (or a photo copy) you are authorized to release a copy of these records to any person who is my personal representative. I understand the information disclosed pursuant to this authorization may be subject to re-disclosure by the personal representative and may no longer be protected by federal law.

The purpose of the disclosure is to enable the person(s) named above to fully act as my personal representative under HIPPA, including the ability to access and re-release my medical records. This authorization shall be deemed to comply with all requirements of HIPPA (45 CFR Section164). This authorization shall become effective on the date it is signed and expire two years after my death. I understand that I may revoke this authorization at any time, without regard to my mental or physical condition, by sending written notice to my medical providers or by using any method capable of revoking a health care agency under Illinois law.
